04 December 2023

Room 228

Mittelstrasse

11 December 2023

Room tbd

Mittelstrasse

1.5 ECTS

Registration

via KSL

One-on-one, semi-structured interviews are a dynamic and widely used qualitative research method across diverse disciplines. Research interviews, as a form of qualitative data collection, are ideal for understanding the subjective and situated experiences, perspectives, practices and language of research collaborators—within any given context. During this intensive workshop, participants will learn how to design generative interview questions, examine power relations and ethical considerations, and experiment with hands-on interview techniques and audiovisual possibilities.

Dr. Darcy Alexandra

is an innovative and experienced lecturer and researcher at the Institute of Social Anthropology, University of Bern.
